Department of Biomedical Engineering

Preliminary Design Review (PMR)

for Clinical Body Thermometer

Part Number: 01-MIY-004

Rev-1

Date: 10/12/2025

Doc. No: 11-MIY-004	Preliminary Design Review (PMR) for Clinical Body Thermometer	Rev:01	Page 3/5
ALL RIGHTS RESERVED. REPRODUCTION OR ISSUE TO THIRD PARTIES IN ANY FORM WHATEVER IS NOT PERMITTED WITHOUT WRITTEN AUTHORITY FROM THE PROPRIETORS.			

1. PURPOSE

According to the Project Management Plan, this document will confirm that the initial design work is completed and ready to proceed the detailed design.

2. SCOPE

The scope of the design activities leading to the Preliminary Design Review includes to formally verify that the proposed design approach is sound and that all necessary foundational design documents are completed using a check list, thereby enabling the project to formally proceed to the resource-intensive detailed design and specification phase.

3. RESPONSIBILITY

Program Engineer is responsible, scheduling, organizing. System Engineer makes available the design data and report the design review. Quality Engineer is responsible for analysing the reports and make corrective actions.

4. REFERENCES

- 4.1. Project Management Plan
- 4.2. System Requirements Specification
- 4.3. Design Description Document
- 4.4. Configuration Item List

5. CHECK LIST FOR PRELIMINARY DESIGN REVIEW

Item No	Task Description	Status	C/A
1	System Requirement Specification is prepared and approved by QA	OK	
2	Each requirement is unambiguous, verifiable and is not conflict with other requirements	OK	
3	Applicable standards and guidance are considered	OK	

Doc. No: 11-MIY-004	Preliminary Design Review (PMR) for Clinical Body Thermometer	Rev:01	Page 4/5
ALL RIGHTS RESERVED. REPRODUCTION OR ISSUE TO THIRD PARTIES IN ANY FORM WHATEVER IS NOT PERMITTED WITHOUT WRITTEN AUTHORITY FROM THE PROPRIETORS.			

4	All requirements are correctly defined	OK	
5	Environmental requirements are defined	OK	
6	Safety requirements are defined	OK	
7	Design Description Document is prepared and approved by QA	OK	
8	The design should be capable of being implemented, tested and maintained	OK	
9	All hardware functions and interfaces are covered	OK	
10	Architecture is covered completely	OK	
11	Configuration items are shown in a block diagram	OK	
12	Configuration Item List document prepared and approved by QA	OK	
13	Each configuration item has a specific part number for identification	OK	
14	The components to be used in the design are not obsolete	OK	
Status: OK (Okey) or NOK (Not Okey) If the status is NOK then Corrective Action Due Date will be written C/A:			

6. APPROVALS

Efe Ateş - Program Engineer

Gülşen Demir - System Engineer

Augusta Nwosu - Electronics Engineer

Ayşe Sarıkaya - Mechanical Engineer

Fadime Taş - QA Engineer

Eren Can Kayabaşı - Software Engineer

Furkan Bacak - Production Engineer
