DESCRIPTION GY-906 MLX90614 Non-Contact Infrared Temperature Sensor Module MANUFACTURER Melexis SPECIFICATION Sensor IC: MLX90614 Measurement Type: Non-contact infrared temperature sensing Operating Voltage: 3.3V – 5V DC Interface: I2C Object Temperature Range: -70°C to +380°C Ambient Temperature Range: -40°C to +125°C Accuracy: ±0.5°C (typical) Resolution: 0.02°C Field of View (FOV): ~90° (module dependent) ADC: 17-bit internal ADC Output: Digital (I2C) + optional PWM output Response Time: Fast thermal response Calibration: Factory calibrated FEATURES Non-contact infrared temperature measurement High accuracy (medical-grade calibration capability) I2C digital communication for easy microcontroller integration Low power consumption (suitable for battery systems) Compact breakout module (GY-906) Dual temperature measurement (object + ambient) Suitable for Arduino, ESP32, ESP8266, STM32 Fast response time for real-time monitoring Can measure moving or inaccessible objects Up to 127 sensors on the same I2C bus (address configurable) TERMINALS VIN – Power supply (3.3V / 5V) GND – Ground SCL – I2C clock line SDA – I2C data line										SAYFA REV DURUMU						REVIZYONLAR
